

Logitech G27 G25 Shifter

The gearshift holder is specially designed to fit the gearshift of the Logitech G25/G27. For use both on the left and right side:

The Logitech gearshift can be mounted in 3 simple steps as follow:

1) Before installing the shifter on the GearShift Holder you need to disassemble grip from the shifter.

2) To disassemble the grip, you must remove the four (4) screws under the Logitech G25/G27 shifter.

3) The gearshift is now ready for mounting on the gearshift Holder.

Now you are ready to mount the Logitech G25 shift into Playseat's [metal shift holder](#) for the most comfortable racing simulation ever!
